

TANDEM full extension with integrated TIP-ON

Quality steel for your wooden design ideas

You'll already be familiar with the versatility of the TANDEM runner system and the convenience of the TIP-ON motion technology. Now we have combined the advantages of both – in the new TANDEM full extension with integrated TIP-ON. This means a better quality of living with fewer components. The TANDEM, with its tried-and-tested functionality, is now also available as a more cost-effective solution for your wooden design ideas – including easy assembly and convenient operation.

Contents

- 04 Product advantages
- 08 Easy assembly
- 10 Services and assembly devices

Ordering and planning information

- 12 560H locking device feature – full extension
- 14 561H hook and peg feature – full extension
- 16 Accessories
- 17 Attachment of runners
- 18 moving ideas

Proven programme – new pull-out, huge selection

The new TANDEM full extension with integrated TIP-ON offers the usual options. From a short nominal length of 250 mm to a long nominal length of 600 mm, you will always find the right solution for you. The load bearing class of 30 kg also remains the same. You can choose between the locking device or hook and peg feature depending on your individual assembly preferences.

Fewer components – less effort, extensive functionality

The TANDEM full extension with integrated TIP-ON makes everything easier and is also more cost-effective. Thanks to the reduced number of components, the runner system takes up less space in your storage area. You also save time on assembly and installation, enabling you to benefit from both reduced effort and the extensive functionality of Blum motion technology.

Easy to open – enhanced convenience for a better quality of living

Experience a high quality of living – for example with easy-to-open handle-less fronts. The integrated TIP-ON mechanical opening support system guarantees the familiar Blum quality of motion. A light touch is all it takes to open the drawer. Thanks to synchronisation, you can touch almost anywhere to open, even the corners on the front.

With synchronisation – practical all the way

To open, touch lightly anywhere on the front – in the centre or to the side. A concealed synchronisation linkage connects the runners, giving TIP-ON a large trigger range.

Easy installation – quickly install or remove

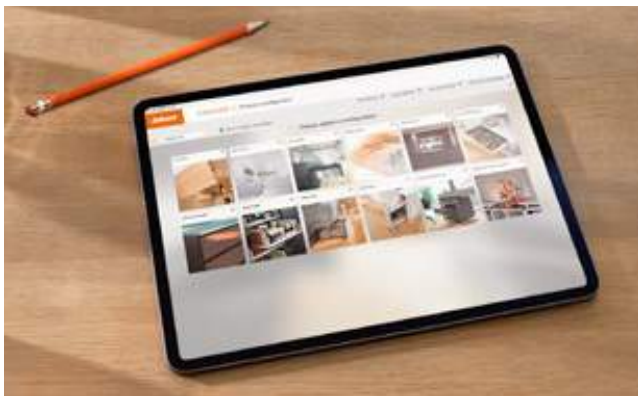

As TIP-ON is already integrated into the TANDEM runner, no additional parts are required. This also means that less effort is involved in installation and removal. As is the case with all TANDEM variants, you can choose between the locking device or hook and peg feature – both of which feature easy adjustment and a practical lift-off stop. No adapters are required for the self-explanatory installation of the single-piece synchronisation linkage that can be cut to size.

Services and assembly devices – precise, practical and professional

We offer services and assembly devices to complement the TANDEM full extension runner system with integrated TIP-ON. We support you along the entire process chain: our E-SERVICES help you to plan, design and choose products around the clock. In addition to drilling and insertion machines, we also offer special drilling templates for furniture production, such as for TANDEM with the hook and peg feature or for the TANDEM front adjuster.

560H locking device feature – full extension – integrated TIP-ON

- Concealed TANDEM full extension for wooden drawers with a panel thickness of 11 to 16 mm
- Includes integrated TIP-ON motion technology – the mechanical opening system
- Low-friction cylindrical nylon rollers ensure a feather-light glide
- Tool-free height adjustment via a locking device
- Tool-free integrated front tilt adjustment
- Integrated tool-free depth adjustment
- Recommendation: optional TIP-ON synchronisation for secure triggering even with wide fronts

moving ideas

We believe that ideas can move the world. We offer innovative fittings, inspiring furniture concepts and appropriate services so that you can turn your creative ideas into reality. We are driven by your needs, international trends and our shared vision of a better quality of living. Let us work together to create moving ideas.

Quality of living

We would like you to enjoy greater convenience and functionality when using furniture.

Product range

Everything from a single source: our wide range of products allows you to keep up with today's and tomorrow's trends.

Inspiration

We monitor global trends and strive to create the solutions of tomorrow. We like to share our insights with you.

Innovation

We stay in motion. Curiosity and pioneering spirit drive us to develop new products and services for you.

Services

We support your daily operations with customised services tailored to your processes.

Quality

We continuously strive to improve our products, services and ourselves.

Trust

We take responsibility for partnerships, our employees, society and the environment.

Julius Blum started our journey in 1952 with horseshoe studs. Today we supply innovative fittings to customers in over 120 countries.
