

# Bottle storage

holds your bottles safely in place

PRODUCT  
MEMO

**blum**

Blum's Bottle storage is one of the most innovative products from Blum. This bottle set includes cross dividers which hold bottles of all shapes and sizes upright, and a stainless steel drip tray. A simple wipe suffices to maintain the cleanliness of your drawers.

## Securely held in place

The high fronted pull-out is especially well-suited for storing bottles of every size. Adjustable ORGA-LINE cross dividers ensure that bottles are held securely in place while providing easy access to oils, vinegars, marinades and dressings. Bottle storage is available for TANDEMBOX plus and TANDEMBOX intivo.

## Drip tray

The stainless steel drip tray under the bottles is easy to remove and clean. Up to 55% more items can be stored in the drawer when high back and side panels are used.

## Solution for bottles

Your Preparation zone is best equipped with a drawer that has bottle storage in it, securing the bottles from falling over. Here are some suggestions on how you can maximise the bottom drawer of your cabinet:

- The right side can contain your bottled spices such as oil, vinegar, soy sauce and some juices.
- The small part of your drawer can contain cutting boards.
