

New motion technology

TIP-ON BLUMOTION for TANDEMBOX

Two functions – fascinatingly combined

www.blum.com

The Blum logo, featuring a stylized white arrow pointing upwards and to the right, followed by the word "blum" in a bold, lowercase, sans-serif font. A registered trademark symbol (®) is located at the top right of the logo.

Easy one-touch opening and silent and effortless closing.

TIP-ON BLUMOTION for TANDEMBOX offers a system which combines the advantages of both TIP-ON and BLUMOTION.

It is now mechanically possible to open the pull-out with just a light touch and close it silently and effortlessly.

With TIP-ON BLUMOTION for TANDEMBOX, you can experience convenience, with an inspiring smooth running action and harmonious motion.

Small front gap

TIP-ON BLUMOTION can be designed with a small front gap of 2.5 mm. An extensive trigger range is even achieved with wide and high fronts, thanks to optional synchronisation. TIP-ON BLUMOTION is the perfect mechanical solution for handle-less fronts and modern design concepts in all living areas.

Fast and easy adjustment

The four-dimensional adjustment options ensure an exact gap layout and the front gap can be extremely precisely and conveniently adjusted.

Reliable function

There is no need to pull to open or manually push to close, but it is possible to do so without difficulty. TIP-ON BLUMOTION is fully functional at all times and remains securely closed even if it has been pushed manually.

Tangible technological improvements: TANDEMBOX

In developing TIP-ON BLUMOTION for TANDEMBOX, some of the main features of the box system have been refined.

— Easy opening

Lower opening forces and an even smoother transition to the feather-light glide raise the level of convenience from the moment you open the pull-out.

— Quality to the touch

You can feel the increased stability provided by the combination of the optimised drawer side and new front fixing bracket.

— Optimised feather-light glide

Components in the drawer side and cabinet profile have been developed, perfecting the feather-light glide of TANDEMBOX and the smooth running action even further.

Innovative technology
that opens up new opportunities
